Acknowledgement

I am very much indebted and have great pleasure in expressing my deep sense of gratitude to my supervisor Prof. M. Hameedullah, Department of Mechanical Engineering, Aligarh Muslim University, Aligarh, for his creative ideas, instructive guidance and expert advice. His advice and research attitude have provided me with a model for my entire future career. Without him this work would have not been completed. He was always at hand for his valuable suggestions and critical evaluation of theoretical, experimental and statistical results. He provided the necessary facilities for conducting the experimental work. For this and much more I am deeply grateful to him.

I am thankful to Prof. S. M. A. Rizvi, Chairman, Mechanical Engineering Department, Aligarh Muslim University, Aligarh, for his help. I also sincerely thank to Prof. M. Altamush Siddiqui, PhD coordinator, Mechanical Engineering Department, Aligarh Muslim University, Aligarh, for his help and support.

It is also a proud privilege for me to note with deep sense of gratitude that Dr. M. Arif Siddiqui, Department of Mechanical Engineering, Aligarh Muslim University, Aligarh, extended his help to conduct experiments regarding chip micro-hardness tests and prepare specimens for microscopic studies.

I am extremely thankful for the help and services rendered by Mr. Idrish, Mr. Burni, Mr. K. P. Singh, Mr. Mujahid, Mr. Nissar, Mr. Rajesh, Mr. Firoj and Mr. Mukesh in the laboratory for conducting the experiments.

Many thanks to Prof. Shukla, Principal, Prof. R. R. Kharde, head of department Mechanical engineering, Prof. Y. R. Kharde, P. G. supervisor and all other staff of Pravara Rural Engineering College Loni, for their continued appreciation and support. I am also thankful to Prof. Uddhav, Principal, College of Engineering, Nashik and Prof. Mahesh, College of Engineering Pune. Prof. Kureshi Abdul, Principal, College of Engineering Ahmednagar. I also thank to Prof. B. K. Pujari, Ex-Principal, Keshav Govind Vidyalay, Belapur Kd., for his moral support.

Appreciation is expressed to my friends Mr. Jawed Mustfa, research scholar MED and Dr. Ehtesham Husain Abbasi, Commerce Department, Aligarh Muslim University, Aligarh. They helped a lot during my research period since beginning.
I am also thankful to Mr Pachuari, Mr. Farahan, Mr. Rashid research scholar MED, Aligarh Muslim University, Aligarh, and Mr. Gupta, research scholar, Applied Mathematics Department, Aligarh Muslim University, Aligarh, for their moral support and help.

I also sincerely thank to Mr. Dilshad, Mr. Farahan and Mr. Shabaan, Aligarh Muslim University, Aligarh, for their help.

A special vote of thanks for my friend Mr. Saad Saeed Siddiqui, for his help in proof-reading during the completion of the present thesis.

I would like to thank my friends and colleagues at AMU, especially those from division of Mechanical Engineering, for creating congenial environment-residential as well as research.

I am extremely thankful to my wife Mrs Harshda Abhang for her constant encouragement. The support from her always comes instantaneously without demanding. The assurance comes always without questioning. I am also thankful to my daughters Anushka and Tanishka for their quiet support and not disturbing me during my work. Both of them have sacrificed their time for me.

The love and care of my uneducated parent’s Shri Baburao Abhang and Sou Dwarkabai Abhang have always been a constant source of my enthusiasm to complete this work.

Lastly I am thankful to those who directly and indirectly supported and contributed for the completion of this research work.

Laxman Baburao Abhang
