Index

Chapter 1: Introduction ................................................................. Page No. 1-7

1.1 Motivation
1.2 Principle Advantages of the system
1.3 Objectives & Methodology
1.4 Contribution
1.5 Thesis Structure

Chapter 2: Literature Survey ......................................................... Page No. 8-28

Section – I A Diverse well-organized Evaluation Methods for academic excellence &
Various kind of Techniques (E-Rater)
2.1 Gap Recognition & Analysis
2.2 Background
2.3 What is Semantic Web
2.4 Implemented Literature
2.4.1 Project Essay Grade(PEG)
2.4.2 Intelligent Essay Assessor(IEA)
E-Rater

Section – II Architectural Framework
Semantic Web
2.5 Layer Architecture of Semantic Web
2.5.1 XML, Namespace & XML Schema(Syntax Layer)
2.5.2 XML and XML Architecture
2.5.3 RDF And RDF Schema
2.6 Ontology(Vocabulary Layer)
2.6.1 Logic Proof and Trust(Logic Layer)
2.6.2 Semantic Web Application Domain
2.6.3 Summary
Chapter 3  Objective of Research  Page No. -29-35

3.4 Research

3.1 Research Objective
3.1.1 Software Development Methodology

Chapter 4: Formulation of Hypothesis  Page No. 36-49

4.1 Formulation of the Problem
4.2 Hypothesis Decision

A Concept on Academics to Illustrate the
4.3.1 Proposed Method
Working Module with Comparative
4.3.2 Analysis
Semantic performance based plagiarism
4.3.3 checker
4.4 Implemented Software
4.1 Introduction& the DDSCA System

Chapter 5: Scope of Research Work  Page No. 50-62

A Semantic Web-based online examination
5.1 framework: Scope of Research Work
5.2 Current status of Online Examination
5.3 System Architecture
Online Intelligent Semantic Performance based
5.4 Solution
5.4.1 The Aim of the performance based system
5.4.2 Components of OISPS
Contributions of the Semantic Web to Online
5.4.3 Examination
5.5 Semantic Description
A Semantic Web-based online examination
5.6 framework
5.7 Design Object
5.7.1 The framework
Chapter 6  Methodology

6.1 Semantic Web Layered Architecture
   6.1.1 URI
   6.1.2 Unicode
   6.1.3 Logic, Proof, Trust & Digital Signature
   6.1.4 Configuration on Pre Arrangement
   6.1.5 Direct Screen Examination

6.2 Students Paradigm
   6.2.1 Administrator Paradigm
   6.2.2 Intelligent Semantic Performance based Solution

6.3 The Aim of the Performance based system
   6.3.1 Components of Performance Based System
   6.3.2 Techniques
   6.3.2.1 XML & XML Architecture

6.4 Information Flow and Collaborative Life

6.5 RDF Association
   6.5.1 RDF Representation
   6.5.2 Web Ontology Tool
   6.5.3 Method for ontology supported learning
   6.5.4 Enhanced learning Model based on semantic web

Chapter 7  Conclusion & Future Work

7.1 Conclusion
7.2 Future Work

Chapter 8  References
