ACKNOWLEDGEMENTS

The results of the research work documented in this thesis would not have been possible without the inspiration and help provided by numerous persons in so many ways that is difficult to mention all of them for want of space. I would like to acknowledge some of them.

Reasons are aplenty to thank my guide Dr. N. Dharmaraj, Associate Professor, Department of Chemistry, Bharathiar University, Coimbatore. The first and foremost being the academic freedom he has given me. I deemed it as an honor to be his first Ph.D. student. I thank him for the opportunity he has given me to undertake my research career in an interesting field of chemistry, delivering novel ideas and technical expertise, providing all required facilities and spending his precious time for discussions. He never set a dead line for any piece of work, but has been a keen observer and has always appreciated little success across the work. He has been practical enough to understand the failures I occasionally encountered during my early stage of research and has consoled me with a pat on the back. Approaching a problem in the right and unique way whether in chemistry or life, being very clear-cut in scientific interpretations and quick decision making are some of the prime assets I owe him. Above all, I sincerely acknowledge his kindness and patience in every approach that helped me a lot through all the years in bringing out this thesis.

I express my sincere gratitude to the authorities of Bharathiar University, Coimbatore, for the infrastructural facilities provided to perform the required research activities.

I take this opportunity to acknowledge University Grants Commission (UGC), Government of India, New Delhi, for the financial assistance in the form of Junior research fellowship during 2008-2010 followed by Senior Research Fellowship during 2010-2011 under Research Fellowship in Science for Meritorious Students (JRF-RFSMS) that buttressed me to make payment for analytical studies.
I am indebted to thank **Prof. K. Natarajan**, Emeritus Scientist (CSIR), Department of Chemistry, Bharathiar University, Coimbatore, for his valuable advice and constructive criticism during my Ph. D programme.

My sincere thanks are due to **Prof. K.J. Rajendra Prasad**, Head, Department of Chemistry, Bharathiar University, Coimbatore and other faculties **Prof. S.P. Rajendran**, **Prof. S. Govindarajan**, **Prof. P.S. Mohan**, **Dr. M. Ilanchelian** and **Dr. R. Prabhakaran**, Department of Chemistry, Bharathiar University, Coimbatore, for their support and encouragement to carry on the my study.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories. I owe a great deal of appreciation and gratitude to **Prof. Alan H Cowley**, Department of Chemistry and Biochemistry, his student **Rachael R Butorac**, University of Texas at Austin, United States of America, **Dr. Nattamai S.P. Bhuvanesh**, Department of Chemistry, Texas A&M University, United States of America for their help and collaboration to solve single crystal X-ray structures. I also acknowledge **Prof. P. Thomas Muthiah** and **Dr. R. Ramesh**, Department of Chemistry, Bharathidasan University, Tiruchirappalli for having provided X-ray diffraction, NMR and EPR facilities.

The support rendered by various institutes in India namely, IIT Madras, IISc Bangalore, IICT Hyderabad, CDRI Lucknow, National centre for Ultrafast Processes-University of Madras, Chennai, are gratefully acknowledged for recording various spectra. I sincerely thank the authorities of **KMCH College of Pharmacy**, Coimbatore who helped to conduct biological investigation of the samples. I am grateful to **Prof. R. Ramu**, Chairman and **Prof. K. Pitchumani**, School of Chemistry, Madurai Kamaraj University, Madurai, for their help in recording circular dichroism spectral measurements.

I take pleasure to record my thanks to **Prof. S. Manian** and **Ms. N. Loganayaki**, Department of Botany, Bharathiar University, Coimbatore, for their help to assess the antioxidant and microbial properties of the samples. I extend my heartiest thanks to
Dr. K. Senthilkumar, Assistant Professor, Department of Physics, Bharathiar University, Coimbatore, for his help to do theoretical studies. I also thank Dr. S. Natanasabapathy, Director and Dr. K. Kadirvelu, Joint Director, DRDO-BU CLS, Bharathiar University, Coimbatore for offering some instrumental facilities.

I simply fumble for words to express my heavy debts of gratitude towards Dr. C. Jayabalakrishnan, Department of Chemistry, Sri Ramakrishna Mission Vidyalaya College of Arts and Science, Coimbatore, Dr. R. Karvembu, Department of Chemistry, National Institute of Technology Tiruchirappalli, Dr. Abraham John and Dr. K. P. Elango, Department of Chemistry, Gandhigram Rural Institute, Dindigul, Dr. R. Mayilmurugan, Department of Chemistry, Madurai Kamaraj University, Madurai, Dr. K. Paneerselvam, Professor, Department of Bioinformatics, Karunya University, Coimbatore and Mrs. M. Chitra, for their help in all possible dimensions with which I came up to this stage.

The person who deserves a special mention over here is my fellow researcher Ms. P. Sathyadevi. She has been my friend, staunch supporter and well wisher, since the day I have joined for Ph.D, who stood behind me in all endeavors and cherishing moments. Her support always regenerated confidence when I squander during my research carrier. I am identified to her care and concern which turned a new leaf in my life.

I would like to thank colleagues in our laboratory Mr. D. Selvakumar, Ms. N. Neelakandeswari, Ms. G. Sangami, Mr. P. Emayavaramban, Mr. M. Alagesan and Mrs. E. Jayanthi, whose association perpetually refreshed, memorable and gave a pleasant time while working with them.

I would like to express special thanks to my seniors Dr. N. Chitrapriya and Dr. M. Manoj for their ideal suggestions and support during the initial stages of my work. I gratefully acknowledge all the friends and juniors of our department who helped me during the course of my research.
My heart bounces with joy to thank my friends Mr. G. Karthik Ganesh, Mr. D. Senthilraja, Mr. R. Vijayabharathi, Mr. M. Ranjithkumar, Mr. K. Chandra Prakash, Mr. K. Kanagaraj, Mr. S. Jayabal, Mr. N. Vasimalai, Mr. M. Ulaganatha Raja, Mr. E. Ramachandran, Ms. S. Nirmala Devi and Ms. K. Prabha for their unwavering support, patience, love and thought-provoking talks about science and life in general over the years of study.

Dr. M.V. Kaveri, Technical officer and Ms. P. Kavitha, Assistant technical officer, Department of Chemistry, Bharathiar University, Coimbatore for their technical support whenever needed. I am duly bound to thank the supporting staff members of our department.

My parents, Mr. S. Paramasivam and Mrs. P. Poovathal deserve special mention for their unlimited love, support and prayers for my wellness. I wholeheartedly thank my loving brother, Mr. P. Vasudevan, for his constant support, love and encouragement over the years in which he made tougher times look easier. I am really running shortage of words to thank him for having understood me all the time.

Nothing would be possible without the mercy of Almighty and I would like to thank god for being merciful to shower me with his blessings.

Paramasivam Krishnamoorthy.
