ACKNOWLEDGEMENTS

I would like to offer my heartiest salutation to the Almighty God for unbroken health and courage bestowed upon me in all adversities at every step and at every moment throughout the entire span of my studies and in other aspects of my life.

Words are not adequate but infinite in spirit to express my deep sense of veneration and gratitude to my esteemed Guide Dr. S. C. Rajvanshi, Professor of Applied Mathematics, at Swami Vivekanand Institute of Emerging Technology, Banur (Punjab), for his eloquent guidance and encouragement. His consistent and unflinching encouragement for exploration in the area of research and his keen interest has always been a source of constant inspiration to me to carry out research work. I also thank my Co - Guide Dr. Poonam Agarwal for her valuable suggestions throughout the study.

I am thankful to the Principal, Swami Vivekanand Institute of Emerging Technology, Banur (Punjab), for forwarding my application as a research scholar for Ph.D at Punjab Technical University Jalandhar.

I express my gratitude to Dr. P.K. Sharma for generating my interest in fluid mechanics and helping me from time to time.

I like to convey my thanks to Dr. N. C. Sacheti and Dr. A. K. Singh for providing me much needed inspiration and valuable suggestions in one or the other way regarding numerical methods, references and research papers. I like to express my gratefulness to Dr. S. R. Jain, for providing me necessary references and introducing me to the use of mathematical tools for solving boundary value problems by MATLAB.

I cannot afford to forget my beloved wife Mrs. Arvinder Kaur for her unfaltering patience and unconditional support. She is my best critic and source of constant motivation. My sons, Mankirat Singh and Harshveer Singh, are a source of perpetual joy for their tolerance of my absence during the preparation of the present work.

My heart fills with deep sense of gratitude and affection to Smt. Pritam Kaur, my grand mother and my parents S. Bahadar Singh and Smt. Gurdev Kaur, who not only encouraged me during my research period but also extended unflinching support and bestowed their blessings. Without their support it would not have been possible for me to complete this work with such zeal and enthusiasm.
I cannot think to windup without expressing heartfelt sentiments for my Late grand father S. Amrik Singh Saini, who taught me the lessons of struggle and patience to attain something in life. His everlasting memories and ceaseless inspiration will remain a guiding spirit in my life. It is to him that I dedicate this work.

BALJINDER SINGH SAINI
